RETIREPILOT

Product Specification v2.7

Approved product decisions, functional scope, five scenario priorities and consumer safeguards

DECISION STATUS / APPROVED PRODUCT CHOICES 1A-7A | PILOT RELEASE / NO-GO

Effective date: 4 November 2026. Supersedes PSD/TSD v2.0 on all changed scope, controls and implementation-status statements. This specification does not constitute financial, security or legal certification.

1. Purpose, audiences and release truth

RetirePilot is a Singapore-first educational financial-planning research product for Singapore citizens and permanent residents aged 45 and above. It helps individuals and households understand cash flow, retirement options and scenario trade-offs over time. It is not a bank, financial adviser, insurer or CPF agent.

Approved scope (1A): personalised calculations using user-provided data, transparent educational explanations and scenario comparisons. Explicitly excluded: recommendations to buy/sell particular regulated investment or insurance products, policy or benefits eligibility determinations, transactions and transfers.

Baseline	In scope	Out of scope
People	Primary users 45+; salaried, gig/platform, commission, self-employed, care, retirement and household transitions	Guaranteed population coverage or claim every Singapore situation fits
Insights	Current cash flow, debts, accessible assets, assumptions, conditional projections	Investment suitability, guaranteed outcomes, CPF entitlement certification
Advisory	Education, explanation, user-controlled comparisons and review tasks	Specific regulated product recommendation or order execution
Release	Local synthetic research only	Real customer records, production financial advice or external pilot

2. Binding product decisions 1A-7A

Decision	Approved interpretation	Consequence
1A	Educational projections, scenarios and explanations; no regulated product recommendations	Reject product-specific advice and execution; escalation text
2A	Official member-provided CPF LIFE estimates only; published examples illustrative	Source declaration required on personal payout input; no automatic formula from RA balance
3A	Keep 96 archetypes, display provisional descriptions with no confidence numbers	Hide scores, thresholds and percentages in all consumer views
4A	Independently verify each adult identity and consent before sharing	No household record sharing until actual verified identity and consent provider exists

Decision	Approved interpretation	Consequence
5A	Prioritise five high-value event models, validate before remaining 41	Bounded previews are not complete event engines; test each independently
6A	Collect reviewer qualifications, proposals and quotes; approve fees first	No appointment or cost without product owner approval
7A	Assume consumer success for planning only; actual 48 interviews still required	Consumer gate remains open with 0/48 observed sessions

3. Business taxonomy and persona policy

The baseline comprises 18 planning dimensions and 96 archetypes across 12 families, A-L, eight each. All 96 are evaluated simultaneously using transparent deterministic rules. They represent an initial coverage library, not evidence of population exhaustiveness or empirical behavioural clusters.

- User-facing descriptions must say “possible planning pattern” or “provisional”; no numerical score, probability, percentile, match quality bar or implied prioritisation.
- Business decisions never depend on a provisional persona score alone; users can correct their underlying facts.
- Incomplete data remains unknown and must not be inferred as zero, consent or a negative result.
- Back-end raw matching weights may be retained for internal quality assurance; external calibration remains outstanding.

4. Financial planning requirements

ID	Required behaviour	Acceptance / limitation
FR-01	Separate income streams with operating costs, deductions, employment patterns and owner	Unknown CPF/tax inputs block unsupported projections
FR-02	Model cash, investments, loans, mortgage servicing, CPF-funded housing sources and life-stage events	All cash and debt flows reconciled; statutory future CPF still not complete
FR-03	Project monthly and aggregate annually using full-month denominators for partial periods	Birthday-end and assessment-start month prorations tested to cent
FR-04	Use explicit CPF LIFE estimate provenance from user official source	Reject public-table/example payouts as personal income
FR-05	Provide assumptions and sensitivities, not financial certainty or advice	Show missing information, unknown policy cases and constraints
FR-06	Maintain accessible balances separately from CPF balances and housing assets	No false liquidity or duplicate asset counting

5. Five priority scenarios (decision 5A)

Scenario	User question	Current development control
S020 Housing downsizing	What net cash might remain after selling, CPF refund and replacement purchase?	Bounded cash waterfall only; official member-transcribed CPF property refund required; no HDB eligibility or CPF interest calculation.

Scenario	User question	Current development control
S030 CPF payout timing	How do my official age-65 and age-70 estimates differ?	Compare two member-transcribed official estimates only; no actuarial break-even or invented payouts.
S004 Part-time retirement	What is the change in household net earned cash after reduced hours?	Requires explicit before/after net income and months; future CPF/tax recalculation omitted.
S016 Parent care	How much recurring cash would an assumed parent-care cost require?	Explicit cost times duration only; subsidies, care leave, insurance and benefit eligibility omitted.
S012 Divorce / family transition	How do legally confirmed obligations change household cash flow?	Blocked pending qualified legal input, authenticated adult consent and domain-specific settlement data.

Four scenarios have narrow arithmetic previews and S012 is deliberately blocked. None has complete event state management or production validation. Other catalogue entries remain in controlled backlog; the 46-entry registry is a design map, not 46 implemented engines.

6. Customer journey and interface

- Progressive onboarding must ask for income sources, expenses, liabilities, assets, retirement goals and CPF statement details, showing why each fact matters.
- Dashboard presents cash flow, accessible liquidity, forecast assumptions, supported stress cases and next-action review tasks.
- Persona panel shows at most three possible patterns with prose explanations and no numerical confidence.
- CPF LIFE panel distinguishes user-transcribed official estimate from public illustration; requires date/source label and explicit limitations.
- Household collaboration entry points remain disabled until identity and consent verification of each adult has passed.
- No actions marked as independently verified without an authenticated external evidence provider; synthetic task status must remain clearly simulated.

7. Research and assurance gates

Gate	Owner / evidence	Current status
Financial	Independent retirement/CPF expert tests exact commit against accepted numeric golden cases	OPEN: internal synthetic arithmetic only
Security	Independent threat model, identity/consent, access tests, secrets and penetration review	OPEN: no production provider
Legal	Singapore-qualified written FAA and PDPA scope opinion, any necessary licence/exemption conclusion	OPEN: no opinion or approval
Consumer	48 real sessions across target segments, comprehension and usability evidence	OPEN: 0/48; hypothetical PASS only for planning
Pilot	Named decision maker accepts all remaining risks on exact release candidate	BLOCKED / NO-GO

8. Metrics and acceptance criteria

- Calculation: no open P0 financial defects; independent reconciliation of supported CPF/tax/housing cash flows.
- Persona display: zero numerical confidence terms across consumer API, UI and exports; all 96 still evaluated internally.
- Privacy: zero uncontrolled household financial-data disclosures; authenticated identity + consent of every relevant adult.
- User comprehension: real tasks demonstrate correct distinction between illustrative projections, official CPF estimates and verified actions.
- Adoption and utility: task completion, scenario comprehension and return usage to be measured only after consented field study.

9. Delivery evidence and status as of 2026-11-04

RetirePilot v2.7 source is a local research branch derived from the v2.6 archive. The local suite passes 609 automated tests, 498 internal persona contract checks and 13 existing API smoke checks. The new checks include partial final-month proration, public persona redaction, CPF LIFE source validation, and priority-preview fail-closed behaviour. These are self-run tests; no independent professional sign-off or GitHub CI result is claimed. The complete remote source migration remains pending.

Appendix A. Full retained 96 archetypes

Family A | A01-A08

ID	Baseline archetype title
A01	Lower-wage employee
A02	Middle-income salaried worker
A03	High-income executive
A04	Dual-income professional household
A05	Single-income family provider
A06	Contract employee
A07	Retrenched professional
A08	Late-career employee

Family B | B01-B08

ID	Baseline archetype title
B01	Ride-hail driver, CPF opted in
B02	Ride-hail driver, not opted in
B03	Motorcycle delivery rider
B04	Bicycle/walking delivery worker
B05	Multi-platform worker
B06	Salaried worker with platform side income
B07	Retrenched worker relying on gig income
B08	Older taxi/private-hire driver

Family C | C01-C08

ID	Baseline archetype title
C01	New property agent
C02	Established high-income property agent
C03	Property agent with declining commissions
C04	Insurance/financial advisory agent
C05	Freelance consultant or professional
C06	Hawker or sole proprietor
C07	SME owner
C08	Multiple-income entrepreneur

Family D | D01-D08

ID	Baseline archetype title
D01	Married couple without children
D02	Single never-married individual
D03	Parents with dependent children
D04	Single parent
D05	Sandwich-generation caregiver
D06	Non-working spouse
D07	Multigenerational household
D08	Parent supporting adult children

Family E | E01-E08

ID	Baseline archetype title
E01	Recently divorced parent
E02	Divorced pre-retiree
E03	Widowed working adult
E04	Widowed retiree
E05	Remarried blended family
E06	Unmarried cohabiting partners
E07	Estranged individual
E08	Person managing a parent's finances

Family F | F01-F08

ID	Baseline archetype title
F01	Fully paid HDB owner
F02	HDB owner with mortgage
F03	Private condominium owner with mortgage
F04	Multiple-property owner
F05	Asset-rich, cash-poor senior homeowner
F06	Older renter
F07	Senior living with adult children
F08	HDB owner considering downsizing/lease buyback

Family G | G01-G08

ID	Baseline archetype title
G01	Early-retirement aspirant
G02	Financially independent early retiree
G03	Pre-retiree with savings shortfall
G04	Worker retiring at age 60
G05	Retiree commencing CPF LIFE
G06	Retiree considering CPF payout deferral
G07	Semi-retired professional
G08	Retiree aged 80+

Family H | H01-H08

ID	Baseline archetype title
H01	High earner with low savings
H02	Moderate earner with substantial assets
H03	CPF-rich, cash-poor household
H04	Investment-dependent retiree
H05	Property-heavy millionaire
H06	Heavily indebted high-income individual
H07	Concentrated-equity holder
H08	Inheritance recipient

Family I | I01-I08

ID	Baseline archetype title
I01	Worker with recurring healthcare expenditure
I02	Employed person with disability-related costs
I03	Person unable to continue working
I04	Parent supporting adult with lifelong disability
I05	Caregiver who left employment
I06	Senior with growing care needs
I07	Retiree with high medication expenses
I08	Couple with one spouse in residential care

Family J | J01-J08

ID	Baseline archetype title
J01	Low-wage employee
J02	Underemployed worker
J03	Long-term unemployed person
J04	Low-income self-employed worker
J05	Senior with very little CPF savings
J06	Senior living alone without financial support
J07	Debt-distressed household
J08	Household losing its main income earner

Family K | K01-K08

ID	Baseline archetype title
K01	Long-term Singapore PR
K02	Newly approved PR
K03	Singapore citizen retiring in Malaysia
K04	Singapore citizen holding overseas property
K05	Mixed-nationality married couple
K06	Employment Pass holder
K07	Work Permit/S Pass holder
K08	Returning Singaporean after years abroad

Family L | L01-L08

ID	Baseline archetype title
L01	Founder preparing company sale
L02	Business owner with illiquid shares
L03	Private-pension recipient
L04	Retired civil servant with pension
L05	Significant rental-income household
L06	Person supporting overseas relatives
L07	Individual planning complex inheritance/charitable giving
L08	Senior exposed to financial exploitation
